GOOGLE WORKSPACE™ ADD-ON

NMai Intelligence Fortress

From an age of opening AI, to an age where AI is right beside your work.

In the Gmail™ side panel you open every morning: an AI advisor that never forgets and never leaks.

CONCEPT

NMai aims to be a secure data bank for your ideas.

Your daily ideas, judgments, decisions, and doubts are the most valuable assets you and your company have.
NMai aims to be the place that keeps those ideas, lets you draw on them when you need them, and never lets them leak.

Two typical ways to use NMai.

From a spark of an idea to reality.

PATTERN 01

Idea notebook

Spark ideas, prepare

THE USUAL

“Where did I write that idea down?”

Ideas get scattered across notes, planners, and sticky notes. When you need one, you can’t find it — or you’ve forgotten you wrote it at all.

WITH NMAI

When an idea comes to you, **just tell NMai**. It works as your sounding board, helps you expand the idea, and remembers it with tags. Months later, you can bring back “that plan I thought about before,” and **connect scattered ideas into a new plan**.

PATTERN 02

Daily work

Act, record, report

THE USUAL

“Please report on our progress with Client X.”

Visits, meetings, phone calls — decisions rarely stay in email. Pulling together your memory and notes turns a report into half a day’s work.

WITH NMAI

Just tell NMai about your day, like a daily report. NMai compiles it into daily highlights, so a single request — “Summarize our progress with Client X” — turns into **a living report** in Google Docs™.

Daily	Weekly	Monthly
Just talk	Last 7 days	Deep recall

Accelerate your ideas into reality.

The more you move forward, the more you build up.
The more you build up, the more you can use.

And it is never used for training — **it remains yours.**

Never leaks. Never drifts. Never forgets.

NMai focuses only on what AI can't do, and people struggle with.

NEVER LEAKS
Masks before sending
Registered company and project names are masked automatically before they reach the AI.

NEVER LEAKS
Checks images & PDFs
NMai also checks the text inside attached images and PDFs, and masks it before sending.

NEVER LEAKS
Not used for training
NMai uses a paid commercial API, so your inputs and responses are not used to train models.

NEVER LEAKS
Replaces shadow AI
One secure AI access point inside your company's Gmail. Prevent shadow AI without banning it.

NEVER DRIFTS
Core Kernel
Your core premises are given to the AI first, every time, so answers stay consistent.

NEVER FORGETS
No separate chats
No need to start a new chat for each topic. One conversation, and NMai remembers it all.

PEACE OF MIND
Does not read your Gmail
NMai has no permission to read your emails, and keeps no memories on your device.

PEACE OF MIND
Reviewed by Google
Passed Google's verification and Marketplace review. Data is stored in Japan (Tokyo).

How is NMai different from other AI? We list what NMai can't do, too.

	Typical AI chat	NMai
Remembers earlier conversations	△	○
Continues without splitting into separate chats	×	○
Restates your premises every time, so it doesn't drift	△	○
Masks confidential words before sending	×	○
Also checks the contents of images and PDFs	×	○
Conversations are not used for training	△	○
Works next to Gmail	×	○
Works on a smartphone	○	○ Opens from the Gmail app
Image generation	○	× Use with other AI tools
Choice of AI models	△	× Gemini™ only (within Google)
No usage limits	△	× Limits apply on all plans

○ Supported as standard △ Depends on settings or plan × Not supported / "Typical AI chat" is a general example assuming free personal use. Actual features vary by service and plan.

Almost everything runs within Google.
From Gmail to the AI (Gemini) and the memory database, NMai runs within Google.

*Payments only are processed by Stripe. TSUKIWA does not store your card information.

Free plan
$0
No time limit

Paid plan
$14.99 / month
About 50¢ a day

Your ideas are yours.

Start free, with an AI that remembers.
